Projects

Foodies-World :

A webpage has been created as per the requirement of a restaurant using HTML and CSS. This page navigates to different menu options.

Fantasy Cricket :

This is a clone model of Fantasy cricket, where one could create their own cricket team by selecting the players from the list. This clone is built using HTML, CSS and Java Script.

Facebook-Clone :

A clone model for face book has been designed, so that one can login and post status or pictures. Also one can see others posts. Designed using React JS and firebase Google Authentication is used to login the page.
